

What is Freshaire?

A strong deodoriser with a unique four-way action to neutralize problem odours. FRESHHAIRE attacks and neutralizes odours, as well as leaving a pleasant reoderant perfume.

Key Benefits

- ✓ FRESHHAIRE has an appealing perfume.
- ✓ FRESHHAIRE is a biodegradable detergent.
- ✓ FRESHHAIRE is excellent for controlling odour problems.

How Does It Work?

FRESHHAIRE is a strong deodoriser with a formula that has a unique four-way action:

- It is a detergent (to remove odour-causing soils)
- It is anti-bacterial (to remove the bacteria that produce odours)
- It is perfumed (to reodorise the air), and
- It is an odour-neutralizer (to attack and neutralize the molecules in the air that cause offensive odours).

For Use On...

FRESHHAIRE removes offensive odours from hard surfaces, carpets, clothing, furnishings and upholstery. It is very useful in nursing homes, hospitals, laundries, toilets, rubbish dumpers, garbage chutes, trucks, kennels, animal pens, and any other places where offensive odours are a problem.

Technical Data

Composition

FRESHHAIRE is formulated with biodegradable surfactants, quaternary ammonium compound, special odour-neutralizers, appealing perfume selected for its lingering capacity, and is water-based. It is non-dangerous.

Properties

COLOUR – Deep green liquid
ODOUR – Perfumed
pH = 5.5 - 6.5
FOAM – Moderate foam level

Environmental Care

FRESHHAIRE conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. FRESHHAIRE is non-flammable, phosphate-free and biodegradable. FRESHHAIRE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996

SAI Certificate No.: QEC7358

Application

- For general deodorising in hospitals, nursing homes and laundries dilute to 1:30 with water and spray on sources of odour, such as soiled linen, napkins, urine, vomit, decomposing food, garbage, etc. Bedpans may be sprayed before and after use.

To identify sources of odour in nursing homes, a UV lamp is very useful. Darken the room and then shine the UV lamp on furnishings, walls and floors. Proteinaceous stains will show up. Once located, such stains should be scrubbed off with a solution of FRESHHAIRE.

- For carpets dilute to 1:10 with water and spray onto source of odour after first extracting clean to remove as much of the soilage as possible. Do not rinse out. For extreme odours, 1:5 FRESHHAIRE may be used.
- In the laundry, FRESHHAIRE may be used as a pre-soaker at the rate of 10ml per 10kg of dry-weight laundry.

Available in: 5L

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all of its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable.
