

What is Citra-Mist?

CITRA-MIST is a spray and wipe cleaner for all hard surfaces. It has been specially formulated to be environmentally preferable.

Key Benefits

- ✓ Highly effective spray & wipe cleaner that gets the job done faster.
- ✓ Leading edge environmentally preferable formula.
- ✓ Very safe to work with: Non-toxic, non-hazardous, non corrosive, contains no skin sensitisers and contains no carcinogens.
- ✓ Great value for money; can dilute to 1 in 20.

Choice Licence!

Environmental Care

CITRA-MIST is the latest in environmentally preferable cleaning chemistry, formulated to provide excellent performance as a spray & wipe cleaner for hard surfaces with minimum impact on the environment.

Naturally, CITRA-MIST is highly-biodegradable, phosphate-free, uses renewable plant-derived surfactants, and conforms with all statutory environmental requirements.

Using the latest 'environmentally preferable' criteria, including California Air Resources Board standards, CITRA-MIST has been formulated with an ultra-low Volatile Organic Content. This means it does NOT contribute to poor indoor air quality, ozone depletion or photochemical smog.

The technically minded will appreciate that CITRA-MIST does NOT contain any alkyl phenol ethoxylates, phthalates, heavy metals, ozone depleting substances, ammonia, amines, butyl solvents, ethylene glycol ether solvents, chlorine, or hydrocarbon solvents.

See page 2 for Disposal Information.

How Does It Work?

CITRA-MIST is a fast-working spray and wipe cleaner which dissolves and removes soilage from all hard surfaces.

For Use On...

CITRA-MIST is excellent for cleaning all types of walls, table tops, benches, doors, Laminex, painted surfaces, vinyl and all other washable surfaces.

With a spray and a wipe, CITRA-MIST will remove soil in one pass with no residues of 'films' being left on the surface.

The pleasant perfume is intentionally mild to prevent irritation and maintain good indoor air quality, but sufficient to let building occupants know 'the cleaner's been here'.

Clever formulating technology and carefully chosen ingredients allow performance that's comparable with established products yet ensures minimum environmental impact and maximum safety for the user.

Technical Data

Composition

CITRA-MIST is a water-based cleaner containing plant-derived surfactants. It has been formulated for rapid soil attack and minimum residue.

Properties

COLOUR – Clear

ODOUR – Lemon

pH = 10 ± 0.5 (see note)

FOAM HEIGHT – Moderate

SHELF LIFE = Minimum 1 year (5°C - 50°C)

Note: Whilst CITRA-MIST is not neutral (pH = 7), it has a pH of 10 which means it is mildly alkaline. This provides a much more rapid "bite" on greasy soil and dirt.

Health

CITRA-MIST is not classified as Hazardous or Dangerous Goods according to the criteria of the Australian Safety and Compensation Council (ASCC). It contains no ingredients that are classed as Toxic.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996

SAI Certificate No.: QEC7358

Application

WEAR GLOVES: as with any other cleaning product, even those that are neutral, gloves must always be worn where ongoing skin contact is possible.

- Dilute 1 part CITRA-MIST with from 5 to 20 parts warm water, depending on soilage. Use the specially printed Agar dispenser bottle to measure out the solution. (Note: CITRA-MIST is suitable for use with an Agar dispensing system.)
- Spray onto the surface being cleaned, spread and wipe off with a damp cloth or sponge.
- Rinse out the cloth or sponge regularly in clean, warm water.

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all of its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.

Disposal Information

1. Used solutions -

Used Solutions of CITRA-MIST should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste.

Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rain water and ultimately lead to the local river system. Although CITRA-MIST has a low aquatic toxicity, detergents in general are not good for aquatic wildlife.

2. Unused product -

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the waste water.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging –

Bottles and drums -

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system.

CITRA-MIST containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons -

Our cartons contain a minimum of 70% of recycled cardboard and/or paper. Used boxes should be flattened and recycled in OCC (old corrugated cardboard) or mixed waste paper recycling programs.

Available in: 1L, 5L & 20L
